

# THE MIRACLE

*In 2015 the depleted land was a shadow of death.  
Trees murdered for charcoal production and  
abandoned prawn farms smelling of toxic water.  
A gloomy future for disadvantaged communities.*

*After planting 8 million mangrove trees by  
end of 2019, life is back. Nature`s remarkable  
capacity to restore itself heralds a message of hope.*

*Thanks for your valuable support.  
18 species of mangrove trees in bloom is the  
undisputable evidence that trees generate life.*

*Mangrove trees are effective climate mitigators.  
Thanking you for trusting our efforts in support of  
Paris Climate Agreement and UN Sustainable Goals.*

*Wishing you a peaceful Christmas and looking  
forward to a greener and more hopeful 2020.*

*Greetings from your battle hardened climate soldiers  
for renewed action in Thor Heyerdahl Climate Park*

*Yangon, December 2019.*

*Arne Fjørtoft, Secretary General WIF*
